PROFILE

Energetic and motivated Software Engineer with hands-on experience in mobile application development, UI/UX, and software engineering. Skilled in React Native, TypeScript, Expo, API integration, and building user-focused applications. A strong problem solver and collaborative team player who is passionate about learning, taking on challenges, and delivering meaningful, high-quality solutions.

WORK EXPERIENCE

Donoro	September 2025 - Present
Software Engineer & Product Lead	Dhaka, Bangladesh
- Contributed to the development and continuous improvement of Donoro, a mobile platform designed to connect blood donors with patients and simplify blood donation workflows. - Developed and implemented mobile application features using React Native, Expo, and TypeScript. - Translated product requirements and UI/UX designs into responsive and user-focused mobile interfaces. - Integrated APIs into mobile application workflows and handled API-driven data, authentication, loading states, errors, and user interactions. - Worked on core application features including donor registration, authentication, blood search, donor profiles, appointment scheduling, notifications, and donation-related workflows. - Collaborated with product, design, and development stakeholders to define requirements, refine features, and deliver production-ready functionality. - Used Git and GitHub for source-code management and collaborative development workflows. - Tested application functionality across different Android devices and screen sizes to identify UI, compatibility, and performance issues. - Designed and executed test cases covering functional, regression, smoke, sanity, UI, compatibility, exploratory, and integration scenarios. - Performed release validation and supported production releases through the Google Play Store. - Continuously evaluated user experience and product behavior to improve reliability, usability, and overall application quality.	
Tech Stack : React React Native Expo TanStack React Query TypeScript Figma Git	
Testing : Manual Testing Functional Testing Regression Testing Smoke Testing Sanity Testing UI Testing	

EDUCATION

Bachelor of Science in Computer Science & Engineering	2022 - 2026
Daffodil International University	Dhaka, Bangladesh
Higher Secondary Certificate	2018-2020
Government Kadam Rasul College	Dhaka, Bangladesh
Secondary School Certificate	2013-2018
B. M. Union School and College	Dhaka, Bangladesh

PROJECTS

Donoro App

Software Engineer & Product Lead

Donoro is a digital blood search and donation app that connects patients with nearby donors in real-time, sending instant notifications to donors and users to ensure timely blood availability and efficient donation scheduling.

- Implemented user-facing workflows including registration, login, donor discovery, blood-group search, profiles, appointment scheduling, and notifications.
- Built mobile interfaces based on product requirements and UI/UX designs with a focus on usability and consistency.
- Integrated backend APIs to support application data and user workflows.
- Worked on location-based donor discovery and mobile user flows designed around real-world blood donation scenarios.
- Contributed to production deployment and Google Play Store release processes.

Self-Distilled Vision Transformer (SD-ViT) for Brain Tumor Classification Using MRI

Researcher & Author

Developed a deep learning-based medical imaging system using a Self-Distilled Vision Transformer (SD-ViT) to classify brain tumors from MRI scans. The model integrates self-distillation within the transformer architecture to improve feature learning and generalization in low-data scenarios. Implemented preprocessing techniques, data augmentation, and evaluated performance using standard metrics such as precision, recall, and F1-score. The project demonstrates strong potential for automated clinical decision support in radiology.

Technologies & Models

- Deep Learning Frameworks: TensorFlow
- Models & Architectures: Vision Transformer (ViT), Self-Distilled Vision Transformer (SD-ViT), ResNet-50
- Techniques: Self-Distillation, Transfer Learning, Attention Mechanism, Image Classification
- Data Processing: Image Preprocessing, Normalization, Data Augmentation
- Tools & Libraries: NumPy, Pandas, Matplotlib, Scikit-learn
- Evaluation Metrics: Accuracy, Precision, Recall, F1-Score
- Domain: Medical Imaging (MRI-based Brain Tumor Detection)

SKILLS

MOBILE DEVELOPMENT

- React Native
- Expo
- TypeScript
- Android Development

STATE & DATA

- TanStack React Query
- Server-State Management
- REST API Integration

Build & Deployment

- Expo EAS Build
- Google Play Store
- Git/GitHub

UI/UX SKILLS

- User Research.
- Wireframing.
- Prototyping.
- Design Systems.
- Color Theory.
- Figma.

SOFT SKILLS

- Collaboration & Teamwork
- Self-Learning
- Problem Solving.
- Analytical Thinking.
- Team Collaboration.
- Communication.
- Product Thinking.

EXTRA-CURRICULAR

IDAA 2025 - Research Paper Publication Held at Daffodil International University	2025 Dhaka, Bangladesh
Data Visionary - National Data Analytics Competition Daffodil International University	2025 Dhaka, Bangladesh
DevFest - AI Innovation Workshop Daffodil International University Computer & Programming Club	2024 Dhaka, Bangladesh
RURS 1st International Student Conference University of Rajshahi	2024 Rajshahi, Bangladesh
Unlock the Algorithm Competition Daffodil International University	2023 Dhaka, Bangladesh
Take-off Programming Contest Top 50 among 2000 Participants.	2022 Dhaka, Bangladesh

ORGANIZATIONS

Atomic BAFSK Science Club , <i>Executive Member</i>	2018-2019
Data Science Club , <i>Member</i>	2022-2023
Computer & Programming Club , <i>Executive Member</i>	2023-2024
NSADIU Student Association , <i>Founding President</i>	2025-2026

INTEREST

Product Strategy & Startups | Product Development | Problem Solving | Sports | Event Management

AVAILABILITY

Open to full-time opportunities and immediate joining.
